CASA

Is the primary data-reduction and analysis tool for radio telescopes like *ALMA* and *VLA*

NRAO guides an international team of developers and scientists that are dedicated to addressing the community's needs for processing radio data.

Common Astronomy Software Applications

- **Pipeline support**: core aspect of CASA development
  ALMA, ALMA single-dish, VLA, VLA Sky Survey (VLASS)

- **tclean:** the improved imaging task

- **CASA Docs:** the new documentation
  https://casa.nrao.edu/casadocs

- **Performance:** parallel processing and optimization of resources
